

CMA (Corn Meal Glucose Agar)

Freshwater Protozoa

Medium**per litre**

Corn meal agar	17.0 g
D-glucose	2.0 g
Yeast extract	1.0 g

Disperse the agar in cold deionised water. Apply heat, stirring constantly. During heating, add glucose and yeast extract. Bring contents to boil. Transfer molten agar to suitable vessels. Sterilise by pressure cooking at 10 psi for 15 minutes.
